

ENVIRONMENTAL POLICY

"It is the policy of Williams & Co Precision Ltd to maintain and operate our business in full compliance with applicable environmental laws, regulations, permits and our Environmental Management System. It is also our policy to promptly evaluate and resolve any suspected instances of non-compliance. We recognise the importance of our environment and natural resources and encourage all our employees to embrace our responsibility with regards to the use of natural resources. We are committed to providing adequate personnel and other resources to comply with applicable environmental laws, regulations and permits and to implement, maintain, and improve our Environmental Management System."

The objective of Williams & Co Precision Ltd is to provide its products and services in a manner that conforms to the requirements and goals we have set, our customer requirements and those applicable requirements specified by the regulatory authorities.

The company recognises its responsibility to the environment and will take steps wherever appropriate and economically feasible to prevent and / or minimise environmental impacts at both the local and global levels. The company is committed to designing its products, adopting processes and practices and using materials that are environmentally conscious as possible.

To this end we pledge to minimise the environmental impact of its operation by:

1. Ensuring the company complies with all relevant legislation and industry codes of practice relating to Processes, the Products we manufacture, the materials we use in our products, and our operation.
2. Applying the principles of reducing, re-using and recycling waste in preference to disposal by landfill, wherever possible.
3. Adopting appropriate measures to conserve energy and other natural resources.
4. Identifying the hazards presented by new and ongoing activities and / or materials and developing procedures to control any associated risks.
5. Seeking to ensure that our working partners exercise a similar degree of Environmental concern.
6. Seeking advice from and agreeing contingency arrangements with the authorities and emergency services, with regard to the use of hazardous materials in case of emergency or accident but ensuring the avoidance of such incidents is a prime consideration.
7. Ensuring through appropriate training that all personnel are familiar with this policy and making this policy available to any interested party.
8. Ensuring that this policy is reviewed, and revised where necessary, at each management review of the Environmental and Health & Safety Management System.

Responsibility for implementation

The Senior Management team are responsible for implementing and ensuring company-wide compliance with this policy and to develop a strategy for continual improvement wherever possible.

The responsibility also extends to the operations of Sub-contractors, to ensure compliance with relevant EH&S legislation and good working practices whilst working for the Company.

This policy is approved and supported by all levels of management within the organisation.
